OR <ul style="list-style-type: none"> - Positive antibody titer for all 3 components (lab report OR physician verification of results required). If titer is negative or equivocal, student must receive a booster vaccine.
Tetanus, Diphtheria & Pertussis (Tdap) (Tetanus shot)	Documentation of a Tdap injection or booster administered <u>within the past 10 years.</u>
Hepatitis B	One of the following is required, EITHER: <ul style="list-style-type: none"> - 3 vaccinations. If series in process, submit where you are in the series. If too much time has lapsed between injections to render the series ineffective, you must restart the series or provide a positive antibody titer. OR <ul style="list-style-type: none"> - Positive antibody titer (lab report or physician verification of results required). If titer is negative or equivocal, student must receive 1 booster shot.

TB Test (PPD)	<p>One of the following is required, EITHER:</p> <ul style="list-style-type: none"> - Multi step PPD TB Skin test within last 6 months. <u>This process requires 3 or 4 visits and may take 2-3 weeks, depending on your healthcare provider.</u> You will receive an injection, return for those results, receive a 2nd injection, and return for those results. If positive results, provide a clear Chest X-ray or signed documentation from your doctor verifying you do not have TB. (Please note: When making an appt, hospitals and clinics administering this test may refer to this test as a “Two Step TB test” even though it involves 3 - 4 steps) <p>OR</p> <ul style="list-style-type: none"> - QuantiFERON-TB Gold blood test results within last 6 months. This test involves a one time blood draw and the results will be sent by email. - <p>You must show results or <u>proof you are in process</u> on Business Day. For the multi step PPD test, You must have proof that your first test has been injected and read by business day.</p>
Covid (including booster)	<p>Completion of either 1 Johnson & Johnson injection OR 2 injections of either Pfizer or Moderna. Students are also required to have received a third dose of the vaccine or a booster. You MUST bring in a copy of your vaccination card AND the actual vaccination card or printed medical record with proof of your vaccination to class on business day. This may require that you take immediate action in order to meet compliance by business day. For any questions regarding Covid vaccination timelines contact the clinical coordinator Erin Olson at eolson@santarosa.edu.</p>

*Prices are subject to change

What is a titer? What is a titer lab report?

A titer is a laboratory test that measures the presence and amount of antibodies in blood. A titer may be used to prove immunity to disease. A blood sample is taken and tested.

If the test is positive (above a particular known value) the individual has immunity. If the test is negative (no immunity) or equivocal (not enough immunity) you need to be vaccinated.

A Titer Lab Report is generated by the lab that tested the blood sample. The Titer Lab Report must include the test type, exact values, signature, and date.
